

# Appendix

The Appendix is divided into three sections: the Minipedia, the Black-Line Masters, and the Index. Each section is described below.

**Minipedia** The Minipedia includes well-illustrated articles on a variety of interesting subjects. You can use the Minipedia to help connect concepts presented in the Smart Sensors module with the discipline you teach. You can photocopy parts of the Minipedia and pass them out to students for background reading or for reference material when they do research projects.

**Black-Line Masters** You can photocopy the black-line masters for students to use as they do the Activities and the Design Projects. The black-line masters provide data tables and other formats for students to record predictions, observations, data, and other information as they do the Activities and Design Projects.

**Index** The Smart Sensors module is packed with fascinating facts about all areas of science. By using the ample index, you can have these facts at your fingertips.

## Contents

Minipedia	
<b>How a Motion Detector Works .....</b>	<b>A2</b>
<b>Everyday Uses of Piezoelectric Film .....</b>	<b>A3</b>
<b>The Physics of Smart Sensors .....</b>	<b>A6</b>
<b>The Chemistry of PVDF Polymers.....</b>	<b>A11</b>
<b>Varieties of Piezoelectric Materials .....</b>	<b>A16</b>
<b>Piezoelectricity and Biology.....</b>	<b>A19</b>
<b>Medical Applications of Piezoelectric Sensors.....</b>	<b>A21</b>
Black-Line Masters.....	<b>A23</b>
Index .....	<b>A45</b>
