

Black-Line Masters

You can photocopy the black-line masters for students to use as they record data and plan and carry out their designs. Completed, they form a basis for students' science logs. If you want students to keep science logs independently, the black-line masters can serve as models for data tables and provide discussion questions for students as they complete the steps of the Activities and Design Projects.

Activity-Log Sheets The Activity-Log Sheets provide data tables and other formats for students to record predictions, observations, data, and other information as they complete the Activities.

Design-Log Sheets The Design-Log Sheets were designed to go along with the steps of the Design Projects outlined in the Student Edition. These Design-Log Sheets can be used with either Design Project 1 or Design Project 2. Students can use the sheets to formulate design proposals, record data, and reflect on their designs.

Contents

Activity-Log Sheets

| | |
|--|----|
| Activity 1 | |
| Motion Detector Setup and Observations | 1 |
| Predictions, Tests, and Observations for Evading the Sensor | 2 |
| Activity 2 | |
| Sensor Tour Summary | 3 |
| Activity 3 | |
| Sensing Sound Predictions and Observations | 4 |
| Activity 4 | |
| Part A: Monomer Sketches | 5 |
| Part B: Polymer Sketches | 6 |
| Part C: Data Table for Bending Tests | 7 |
| Activity 5 | |
| Part A: Predictions and Data | 8 |
| Part B: Predictions and Data | 9 |
| Experimental Procedure | 10 |
| Graph of Data | 11 |

Design-Log Sheets

| | |
|--|---|
| Brainstorm Designs | 1 |
| Propose a Design | 2 |
| Decide How to Evaluate Your Prototype | 3 |
| Predict How Your Prototype Will Perform | 4 |
| Document How to Build Your Prototype | 5 |
| Test Your Prototype | 6 |
| Interpret and Reflect on Your Results | 7 |
| Redesign Your Product | 8 |
| Present Your Results | 9 |
